

Rotary Filter Screen

**Water Recycling
Equipment**

Equipment Description

The Wyma Rotary Filter Screen provides a compact, cost-effective first stage waste water treatment for post-harvest processing applications. It has been designed with pack-house operations and vegetable processors in mind.

The Rotary Filter Screen:

- Enables you to re-use water
- Reduces waste water charges by lowering Total Suspended Solids (TSS) & Biochemical Oxygen Demand (BOD)
- Can be a stand-alone unit or be used in combination with other water treatment technologies such as hydro-cyclone, dissolved air flotation system, sedimentation tanks, screw-press or belt-press.

Technical Specifications:

150mm internal feed	Auger driven solids ejection
Nominal 30 second residence	Adjustable drum inclination
External wash bar Ø50mm	Automatic wash bar timing
Low level pump protection	0.2 - 2.0mm wedge wire screen
Capacity approx 40 - 80m ³ /hr	Low power consumption

Full custom options available.
